Keyboard shortcuts in iMovie on iPhone

You can quickly accomplish many tasks in iMovie using a Bluetooth keyboard.

Note: To pair a Bluetooth keyboard with iPhone, turn on the keyboard (or turn it off and on if it's already on), then go to Settings > Bluetooth. Turn on Bluetooth, then tap the keyboard when it appears in the Devices list.

To complete an action, press all the keys in the shortcut at the same time.

Action	Shortcut
Show the iMovie User Guide	Shift-Command-Slash (/)
Play or pause	Space bar
Play the project from the beginning	Backslash (\)
Go to the beginning of the project	Control-Left Arrow
